

AmnioAMP-PF™

Purified Amnion Fluid

The body's own healing process can break down due to uncontrolled inflammation, **AmnioAMP-PF™** can help it regenerate healthy tissue.

AmnioAMP-PF™ is a non-structural allograft derived from amniotic fluid that is rich in extracellular matrix components, growth factors, proteins, and cytokines, which facilitate proliferation of cells to the site of injury. AmnioAMP-PF™ works by limiting the body's inflammatory response and supports the regeneration of healthy tissue.

AmnioAMP-PF™ can be used to support healing of soft tissues in degenerative conditions and in joint and tendon injuries.

BENEFITS

- Provides a localized anti-inflammatory
- Reduces scar tissue formation
- Helps with the healing process in soft tissue and supports proper remodeling

PURIFIED FLUID ALLOGRAPH

AmnioAMP-PF™	Code	Size	
	SB1300	0.5 CC	CRYOPRESERVED
	SB1301	1.0 CC	
	SB1303	2.0 CC	

USE

AmnioAMP-PF™ can be applied directly at the site of injury, pain or inflammation in a simple in-office procedure.

- Topical application as a covering over wounds or areas of localized inflammation.

Source

AmnioAMP-PF™ is derived from amniotic fluid from pre-screened donor mothers delivering healthy babies by scheduled Caesarean section.

Features of AmnioAMP-PF™

- Cryopreserved – **AmnioAMP-PF™** is cryopreserved for the ultimate in biological viability, with a 5 year shelf life. Product must be kept in a clean freezer with controlled temperature of -40°C or colder for short term storage up to 6 months, or -80°C or colder for long term storage up to 5 years) until ready for use.
- Easy to apply – Provided in an easy to apply flowable form, for precisely delivery throughout the intended site.
- Immuno-suppressive – has been shown to suppresses immune response & modulate inflammation.
- Sterile – is provided in a sterile vial and may be introduced to the sterile field.
- Chorion – Free
